Whitepaper V 1.1

USDR is a Digital assets for a stablecurrency With Binance Smart Chain (BSC) for SMART FINANCE (SF)

Introduction

We believe a "whitepaper" should be easy to read and simply help you understand how the project works. We hope the following information provides that. Let's start with the basics.

Background

Blockchain networks allow for fast, secure, transfer, and creation of digital goods in addition to the storage and execution of tamper-proof programs that can manage digital assets. Once these programs are being deployed on-chain, they cannot be changed and are available to everyone with access to the chain, execute based on the defined parameters and interactions (transactions), and are verified by the blockchain's consensus mechanism.

The price volatility of cryptocurrencies is a major deterrent for mass adoption. Their rapid change in fiat-denominated value causes payment values to vary even during settlement times, being highly inconvenient to merchants that handle them.

Stablecoins are cryptocurrencies with an exchange rate peg with existing fiat currencies or a fiat-related index, thereby drastically increasing their usefulness as a payment medium.

Digital currency built for the earn

Individuals/Traders

Enhance your cross-exchange and currency arbitrage strategy. Be the custodian of your own funds and eliminate exchange custodial risk.

Instant Swap

Trade easily with a click on your App and earn along while increasing day-to-day transaction via our smart contract.

Staking

Stake and enjoy passive income while your investment works for you on our network application.

Low Cost

Almost zero fee transaction on our instant swap application with fast execution on the blockchain.

Cross Chain Wallet

SMART Cross Chain Wallet enables blockchains to communicate to one another. This will be available on Ios, Android and Web extension with severe features.

Yield Farming

USD SMART (USDR) farm is method staking of locking cryptocurrency in Decentralized Financeto earn reward. The theoryof SF Farming as an aggregate called liquidity mining which has been developed from the decentralized finance sector. Of which, is generally a person staking can earn tokens in return for their participation in the DeFi application

Early Bonus

We will always share bonus to first 500 top list holders Bi-Weekly via SF Card for NFTs once the App launch. We will even give the community a free MEME Token COOL CAT MOON as a gift.

What is USDR?

USDR is designed as an algorithmic stablecoin on the Binance Smart Chain. This involves an innovative solution that can adjust the stablecoin supply deterministically to move the stablecoin price towards the target price to bring programmability and interoperability to DeFi.

USDR is a stablecoin pegged to USD. 1 USDR is intended to remain exactly equal to USD 1— not a cent more or less. It's basically a crypto dollar. It can be exchanged to exact amount of SYF which is equal to 1 USD at the time of exchange.

It's worth noting that USDR users are protected from the volatility of cryptocurrency, but they're still exposed to fluctuations in the price of the pegged SF.

Let's say the price of SF is USD 300 now. You can get 300 USDR for 1 SF. After two years, if the price of SF is USD 600, you will can get 0.5 SF for the same 300 USDR.

What is a stable coin?

A Stablecoin is a cryptocurrency that is pegged to a real world currency or popular digital assets. (e.g. the dollar)

Stablecoins are issued by centralized companies that maintain the peg, either by putting up collateral or through some sort of algorithm that manipulates the stablecoin's supply, depending on the demand.

Stablecoins allow exchanges to create actual currency pairs without actually accepting actual currency.

For example, you can have a BTC/USDR or BNB/USDR trading pair which simulates the BTC/USDR or BNB/USDR market without the need for regulation.

Community Algorithm

Although there are many variations of the stablecoin mechanism, USDR typically use a "community algorithmic" approach to managing the token supply according to a predetermined logic. The algorithm is responsible for balancing the supply of stablecoins with fluctuating demand, ensuring that the token price remains relatively stable.

Where to buy?

- Click on the link below to purchase:
<https://usdr.network/get?ref=0xa72d8d0f34b98ae7ac5d618971e917be5e33a138>
- Indicate the amount you would like to purchase, Then Click BUY NOW

However, Purchases would only be Available from 12 June, to 6 July 2021

You can buy USDR at a bonus

- *Payment accepted: BNB only*
- *Purchase via: Self-Drop (investor will interact with our contract address on Binance Smart Chain and receive token automatically)*
- *Soft cap: 700 BNB*
- *Hard cap: 1500 BNB*

All raised funds will liquidity, listing fees Buy-Back strategy, community.

Pre-sale - Start 12 6 2021.

be utilized for projects, on the exchange, Bi-Weekly and expand the

June 2021 - ends in July

Minimum purchase is 0.01

Minimum purchase is 0.01 BNB = Get 100 USDR (receive token automatically in your wallet).

Token Specification

Token Information

Token Name	USDR
Token Symbol	USDR
Token Decimals	18
Token Supply	500,000,000
Token Address	0xE2a780B271Ad9cB1845C24a0AaE93feB5c24C9D2
Network	BEP-20
Blockchain	Binance Smart Chain (BSC)
Explorer	https://bscscan.com/address/0xE2a780B271Ad9cB1845C24a0AaE93feB5c24C9D2

Token distribution

Total Supply	500,000,000 USDR	100%
Staking & Liquidity Rewards	100,000,000 USDR	20%
Pre-sale & Airdrop	300,000,000 USDR	60%
Developer & Team	50,000,000 USDR	10%
Marketing & Promotion	20,000,000 USDR	4%

Bounty	30,000,000 USDR	6%
---------------	------------------------	-----------

Presale Allocation

Lock Liquidity	35%
Bi-Weekly Buy-Back strategy	35%
Development	15%
Promotion	10%
Team	5%

Developer & Team Allocation

2021	33,4%	15,000,000 USDR
2022	33,3%	15,000,000 USDR
2023	33,3%	15,000,000 USDR

DEV SALE – DEV BUYBACK – DEV BURN

Every quarter the Dev & Team allocation issues a token sale, there will be a decline in price, and that's where the community benefits when the price drops, because the dev team will do a percentage of the buyback to return the price, and the tokens buy-back will be in BURN.

(Not financial advice)

ROADMAP

▶▶ May 2021

- Idea research & project development
- Platform developed
- Initial draft whitepaper completed
- Launch USDR project
- Build the USDR community
- Launch the Airdrop program
- USDR presale starts

▶▶ June 2021

- Airdrop & bounty distribution
- List of USDR token on coingecko
- StrongeHolder to Airdrop tokens

▶▶ July 2021

- List of USDR Tokens on 3 big Exchanges
- List USDR token on Coinmarketcap

▶▶ August 2021

- Bi-Weekly Buy-Back strategy starts
- StrongeHolder Airdrop distribution

▶▶ October 2021

- USDR patnership program
- USDR Trading competitions

HOW TO BUY ON PRESALE

The steps:

- 1- Prepare BNB (BSC) Minimum purchase of 0.01 BNB
- 2- Send BNB (BSC) to Smart Contract USDR
- 3- The smart contract will automatically summon USDR Tokens to the sender's wallet
- 4- In seconds, the USD Token will enter the sender's wallet automatically

NOTE:

- It is forbidden to send BNB (BSC) directly from the Exchanger, because your token will be lost
- Send from private wallets such as: MetaMask, Trust Wallet and others
- If sending at least 1 BNB, the sender will get a bonus according to the percentage of each phase

DISCLAIMER

This paper is for general information purposes only. It does not constitute investment advice or a recommendation or solicitation to buy or sell any investment and should not be used in the evaluation of the merits of making any investment decision. It should not be relied upon for accounting, legal or tax advice or investment recommendations. This paper reflects current opinions of the authors and is not made on behalf of Paradigm or its affiliates and does not necessarily reflect the opinions of Paradigm, its affiliates or individuals associated with Paradigm.

The opinions reflected herein are subject to change without being updated.

This whitepaper is not guaranteed. It is impossible to guarantee, and no one can make representations, general guarantees or legal guarantees, that such a license or agreement will be obtained within a certain period of time or not at all. As such, the initiatives described in this whitepaper may not be available in certain jurisdictions. This may require restructuring of related initiatives and/or their unavailability in certain matters or matters. In addition, the development of any initiative is intended to be implemented gradually. During certain stages of development, projects may rely on relationships with certain licensed third-party entities. If this entity is no longer properly licensed in the relevant jurisdiction, it will affect USDR ability to rely on that related party's services.

Not a suggestion :

This whitepaper does not constitute investment advice, financial advice, trading advice or recommendations from USDR, its affiliates, or related officers, directors, managers, employees, agents, advisors or consultants based on the benefits of purchasing USDR tokens and also may not be used as a reference in connection with contracts or other purchasing decisions.

Risk statement

The purchase of USDR tokens involves great risk and can result in the loss of a large amount or the entire amount of associated fiat money. Before purchasing USDR tokens, you should carefully assess and consider the risks, including those listed in other documentation. Buyers may not purchase USDR tokens for speculative or investment purposes. The buyer may only purchase the USDR token if the buyer fully understands the nature of the USDR token and accepts the risks attached to the USDR token.

Cryptographic tokens may be confiscated and/or stolen; hackers or other malicious groups or organizations may attempt to interfere with our systems/networks in a variety of ways, including malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing that may result in the loss of your cryptographic tokens or loss of your ability to access or control cryptographic tokens. In such cases, there may be no redress, and cryptographic tokens holders are not guaranteed any compensation, refunds, or compensation.

The official status of cryptographic tokens and digital assets is currently not specific, differing in each jurisdiction and in great uncertainty. It is possible that in the future certain laws, regulations, policies, or rules relating to cryptographic tokens, digital assets, blockchain technology, or blockchain applications may be implemented that may be directly or indirectly affect or limit the right of cryptographic tokens holders to acquire, possess, store, sell, convert, trade, or use cryptographic tokens.
